## New Coronavirus Infection at Tosei Engineering Corp.

On April 9, 2020, the new coronavirus infection has been confirmed for one employee who works at Kandatsu Plant of our company which is located in Tsuchiura City, Ibaraki Prefecture

### 1. Development of for the infected employee

The employee had a high fever on April 2, and was absent afterwards. The employee was found to be positive for the new coronavirus on April 9.

### 2. The counter-actions taken

The following actions have been carried out based on cooperation with The Local Public Health Center in charge.

- Investigation on travel route of the infected employee and identification of employees who may have been in close contact with him.
- Make the employees who had the close contacts stay at home for 14 days.
- Confirmation and reporting their health condition accordingly.
- Temporary closure of Kandatsu Plant, all the employees waiting at home, disinfection and ventilation.

We sincerely apologize to the local residents and to all who concerned.

We will work to further alert all the employees to prevent the spread of infection and to check their safety and health.

Your understanding would be highly appreciated.

Sincerely
